1.1	Usage	3
1.2	API	3

GameCube Backup Manager (GCBM) is a software to convert ISO files to Nintendont format.

Check out the [Usage](#) section for further information, including how to [Installation](#) the project.

NOTE 1: If you're not finding what you're looking for on these pages, please don't hesitate to ask questions on the GameCube Backup Manager official GitHub.

NOTE 2: This project is under active development.

CONTENTS

1.1 Usage

1.1.1 Installation

To use Lumache, first install it using pip:

```
(.venv) $ pip install lumache
```

1.1.2 Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

The `kind` parameter should be either `"meat"`, `"fish"`, or `"veggies"`. Otherwise, `lumache.get_random_ingredients()` will raise an exception.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```

1.2 API
